Q.2

Create a directory by name /webdata. Create a file by name index.html. This page will display the message "Welcome to ACTS!!!". Build a new image by name webapp1 by creating a Dockerfile. Use nginx as the base image. Now create the container by name web1 using the above image. Map outside port 8000 to this container. Display your webpage on localhost:8000.

'docker build' requires exactly 1 argument.
See 'docker build --help'.

Usage:  docker build [OPTIONS] PATH | URL | -

Build an image from a Dockerfile
