

Practice Assignment-1

Name- Ashlesha Tayade
PRN- 260240128008

Name- Ruchika Gaikwad
PRN- 260240128036

Question:

create a folder by name calc locally.

Go to the folder. Initialize as git repository.

Create a java/python program that takes 2 numbers from user and displays the addition.

Git add and git commit.

Go to GitHub and create a repository by name calc. Do not add any file.

Rename the master branch to main in local repo.

Link remote repo to local repo using git remote add origin URL

Push your java/python program to this repository using git push origin main

Now go to the GitHub edit the java/python file and add the code to display multiplication result.

In the local repo modify the program to display subtraction result.

Git add and commit.

Try git push.

Finally you should have program that displays addition, subtraction and multiplication result in both the repositories.
